

Mobistar Business Solutions

'Machine To Machine'
General Terms & Conditions

These General Terms & Conditions define the services that Mobistar provides to the Customer within the framework of the access to the 'Machine to Machine' service or to the 'Mobile App' service, and the reciprocal obligations deriving therefrom. These General Terms & Conditions contain the general provisions according to which the Customer may use M2M or Mobile App telecommunications or may commercialise such telecommunications to Customers as part of a Value Added Solution.

These General Terms & Conditions are the terms and conditions that apply to the Service – and not to the Machine or the Device.

Article 1 – Definitions

Whenever used in these General Terms & Conditions, the following concepts will have, for the purposes of the underlying Agreement, the meaning as specified hereafter. The defined concepts are written with a capital letter in the text.

Activation Sheet: is the document containing the exhaustive list of the Services that form part of the customer profile which will be configured on the SIM cards, at the Customer's request for activation or pre-activation. It also contains the corresponding prices of the Customer. The completed Activation Sheets form an integral part of the Agreement.

Activation or Activate is the process of making the Service operational so that the Customer can use this Service.

The Special Terms & Conditions are formed by the applicable rates, product descriptions and specific conditions of the Service. In the event of contradiction, the Special Terms & Conditions take priority over these General Terms & Conditions.

The BIPT is the Belgian Institute for Postal services and Telecommunications, founded by the Act of 21 March 1991 on the reform of certain economic public companies.

The Contract is Mobistar's obligation to grant the Service(s) and the Customer's obligation to respect the conditions associated with this Service. The Contract contains at least the identification data of the Customer and sets forth the chosen Service(s) and option(s) and their term.

Service is the M2M Service or Mobile App Service which Mobistar offers within the framework of the Contract . M2M Service means the delivery by Mobistar of the Machine to Machine application; Mobistar's radio communication service allowing the Customer to use a call number in order to receive from and/or send data to an industrial modem, specifically for 'Machine to Machine' applications. The Service is provided by Mobistar to the Customer for the latter's own use or in order to

be sold to Users as part of an Value Added Solution.

Mobile App Service means the delivery by Mobistar of Mobistar's radio communication service allowing the Customer to receive data from and/or send it to a smartphone/tablet (the 'Device'), specifically for 'Mobile App' applications.

The Service is provided by Mobistar to the Customer for the latter's own use or in order to be integrated and sold for Users as part of an Value Added Solution, this within an industrial context and for professional purposes.

The regulatory framework and the *modus operandi* of Machine to Machine (M2M), i.e. this telecommunications application with which data are automatically transmitted between the hardware and the applications, with little if any human interaction, apply to the Mobile App Service.

For the Mobile App Service the use of specific M2M APNs is obligatory.

Documentation: the technical manuals, user manuals, operating manuals and all other documentation relating to the use or operation of Machine to Machine or Mobile App telecommunications or the Portal, including revisions, replacements, improvements and additions. These documents are purely informational.

User: is the end user of the Service.

Customer: is the legal person or association or self-employed person (liberal profession, trader), with whom Mobistar has an Agreement and who uses the Service(s) at least in part for professional purposes.

Machine (or remote Machine): an autonomous device (modem) used at a distance from a server that can communicate with this server by making use of equipment that transfers data (also called an M2M modem).

Machine to Machine or **M2M:** is a telecommunications application with which data are automatically transmitted between the hardware and the applications, with little if any human interaction.

M2M APN (or 'Access Point Name'): refers to APNs that are used specifically within the M2M framework.

Mobistar: Mobistar S.A., a public limited liability company organised and existing under Belgian law, with registered office at Bourgetlaan 3, 1140 Brussels, that operates and commercialises the Service under the registered trademark and the trade name 'Mobistar'.

Agreement: consists of the Contract signed by the Customer and its annexes, the Special Terms & Conditions and the present General Terms & Conditions.

Portal is a self-care tool (web portal) offered to the Customer in order to give him a complete overview of and control over his Fleet of SIM cards.

Roaming enables the Customer, with his SIM card, to make use of other mobile networks abroad.

Server: the Customer's centralised IT equipment remotely controlling the Machine or the Device.

SIM card: the card into which a microprocessor of ISO format (SIM) or of compact format (Micro SIM) is integrated and which is specifically offered by Mobistar for the M2M or Mobile App application.

Fleet: the totality of the SIM cards that are allocated to a Customer.

Value Added Solution: the services and/or products of the Customer, in which an M2M SIM card and M2M or Mobile App telecommunications are integrated, for the Customer's own use or to be offered commercially to the Users.

Web Services: are application programming interfaces (APIs): interfaces implemented by a software program that make it possible to enter into interaction with other software. They facilitate interaction between different software programs without human intervention.

Article 2 – Conditions for entering into the Agreement

At Mobistar's simple request, the Customer must:

- identify himself by means of the original Belgian identity card, the EU resident card or the original identity card for foreign nationals issued in Belgium held by the natural person who is authorised to represent the juristic person or voluntary association;
- submit a copy of the articles of association as published in the Belgian Official Journal and of all subsequent alterations of the articles of association as published in the Belgian Official Journal;
- submit all further documents in order to enable Mobistar to assess the financial position and creditworthiness of the juristic person or voluntary association.

Any person who comes forward as the agent or attorney-in-fact of the juristic person or voluntary association shall be required to identify himself at Mobistar's first request and to submit proof of their capacity as agent or attorney-in-fact.

The Customer is solely liable for the correctness and completeness of the information provided by him.

Article 3 – Entry into effect of the Agreement

Unless otherwise agreed, the Agreement exists as of the Customer's signing of the Contract. If the Contract is concluded via Mobistar's website, the Contract exists as of the receipt by Mobistar of the Customer's e-mail with the order.

All rights and duties of the Agreement apply as of the Customer's signing of the Contract or, if the Contract is concluded via Mobistar's website, as of the receipt by Mobistar of the Customer's e-mail with the order, and the Customer is bound thereby. If the Customer withdraws from the contract prior to the Activation, the provisions of article 16.2 will apply.

Mobistar undertakes to perform the Activation of the Service as quickly as possible, except in the following cases:

- a. the legal person or association refuses to provide the required information mentioned in article 2, or provided incorrect or false information;
- b. the legal person or association failed to fulfil the obligations to which it is obliged under any other contract concluded with Mobistar;
- c. Mobistar has proof or serious suspicions concerning non-payment, fraud or use of SIM card(s) for purposes in breach of the Agreement, in violation of statutory or regulatory provisions and/or contrary to public order, policy or good morals;
- d. the juristic person or voluntary association is a defaulter;
- e. the Customer disrupts or threatens to disrupt the proper functioning of the Mobistar network.

The Customer shall owe the compensations as of the Activation.

Article 4 – Term of the Agreement

The Agreement is concluded for a limited term of three (3) years, counting from the Activation of the Service.

Each time when the period established in the Agreement has expired, the Agreement shall be tacitly renewed for an unlimited term and the Agreement can be cancelled by each Party at any time in writing and without giving reasons. In the event of cancellation by the Customer, the Agreement is terminated at the time chosen by the Customer, even immediately. Mobistar then stops the Service as quickly as technically possible and sends a written confirmation thereof to the Customer. In the event of cancellation by Mobistar, a notice period of one month shall be respected by Mobistar.

The Parties confirm that the various contracts concluded with

Mobistar can have different terms and therefore different expiry dates. The cancellation of a contract for a specific service, such as mobile voice, therefore does not entail cancellation of this Agreement concerning the Service, and vice versa.

Article 5 – Modification of the Machine to Machine General Terms & Conditions and rate increase

5.1. In the event of a modification of these Machine to Machine General Terms & Conditions or a rate increase, with the exception of an increase in the roaming rates, the Customer shall be notified about this one month in advance.

5.2. The Customer who does not accept the modification of the Machine to Machine General Terms & Conditions is entitled to cancel the Agreement, at no expense and in writing, at the latest on the last day of the month following the entry into effect of the modifications, except in the event of a change to the regulatory framework that leaves Mobistar no choice concerning the manner of implementation of the changes imposed by the regulator. The Customer who does not accept a rate increase, with the exception of an increase in the roaming rates, is entitled to cancel the Agreement at no expense and in writing, at the latest on the last day of the month following the receipt of the first invoice after the entry into effect of this rate increase.

Article 6 – Value Added Solutions

The Customer can integrate and implement M2M or Mobile App telecommunications into his products and/or services, as part of an Value Added Solution, in order to use this solution himself or offer it commercially to Users.

The Customer agrees not to resell, resupply or otherwise distribute the SIM cards and the Service for purposes other than the Value Added Solution without Mobistar's advance written consent.

The Customer agrees to take all reasonable steps in order to guarantee that the Users and their possible customers are aware of and act in conformity with the general provisions of this Agreement and the related annexes. The Customer acknowledges that a breach of this Agreement by a User constitutes a breach by the Customer.

Article 7 – Voice traffic

Voice traffic is possible to a limited number of telephone numbers, as detailed in the Special Terms & Conditions.

When an SIM card is used for other than M2M or Mobile App communications, Mobistar will invoice the Customer for these communications outside Machine to Machine or Mobile App at the applicable standard voice rates.

Article 8 – Steering

Mobistar reserves the right to implement in the SIM cards a list of preferred networks (a 'steering') to which these cards are preferably oriented, in order to be able to offer the Customer adapted rates. The steering that applies is detailed in the Special Terms & Conditions.

The Customer undertakes to make no adaptations of any kind to the steering implemented by Mobistar and not to use any Machines or Devices or perform other manipulations within the framework of a Value-Added Solution, which can endanger the proper functioning of the steering implemented by Mobistar. Within the framework of the Value-Added Solution the Customer shall make all adaptations that are necessary for the proper functioning of the steering.

Mobistar bears absolutely no responsibility for the impact on the quality of the telecommunications, if the Customer does not comply with the above-mentioned obligations. In that event, Mobistar also reserves the right to change the agreed rates.

Article 9 – Privacy protection

a. Each party undertakes with regard to personal data that should be processed during the implementation of this Agreement, to respect the applicable laws on privacy protection (including the EU Data Protection & Privacy legislation). Each party shall do everything in its power to work together with the other party in order to enable the other to comply with its statutory obligations.

Each Party guarantees that it and its subcontractors have taken the appropriate technical and organisational measures that are necessary in order to ensure a suitable security level and to protect the personal data against unauthorised changes, unauthorised access, loss, theft and any other unauthorised processing.

b. As data controller, Mobistar processes personal data that are furnished by the Customer, including therein any personal data of the Users.

Mobistar processes these personal data within the framework of the implementation of the Service, invoicing of the Service, management of the information provided by the Customer,

processing of the questions asked by the Customer and fraud control.

As data controller, Mobistar processes traffic data of the Customer and of the Users, within the framework of invoicing for the Service.

The above-mentioned data of the Customer and the Users are recorded in Mobistar's databases, which are the property of Mobistar.

c. Within the scope of the applicable legal provisions, the natural person who can prove his identity can obtain the communication or request the correction of his data that are processed by Mobistar by sending a signed and dated letter to Mobistar's customer service department.

The Customer can put himself on the 'No calls list' via the URL: www.Bel-me-niet-meer.be in order to object to the use of the telephone number(s) allocated to him for direct marketing purposes. The Customer may continue to receive direct marketing calls until at the latest one month after registration.

Article 10 – Rates – Invoicing – Payment conditions

10.1. Rates

The rates for the services provided by Mobistar are defined in the Special Terms & Conditions.

10.2. Invoicing

Each month, Mobistar shall send the Customer an invoice in euros with the costs for the Service.

However, Mobistar reserves the possibility to depart from this periodicity after having notified the Customer thereof.

10.3. Mobistar cannot be held responsible for invoicing data that are passed on by third parties for services that they provided.

The Customer acknowledges and accepts that costs for services that are not provided directly by Mobistar, such as roaming services, can be invoiced at a later time than foreseen, and sometimes with several months' delay. Mobistar shall make the necessary efforts in order to limit this period to a maximum of 6 months. Mobistar is not liable vis-à-vis the Customer for such delay.

10.4. The Customer undertakes to process the invoicing data only in strict compliance with the applicable laws relating to secrecy of communication, privacy protection and the processing of personal data.

10.5. Payment conditions for the invoices

10.5.1. Unless some other payment period is stated on the invoice itself, the invoiced amounts must be paid within 30 days.

If a different payment period was contractually agreed and if, for the Customer involved, bankruptcy has been applied for or demanded, or in the event of manifest insolvency or a situation of suspension of payments or evident inability to pay on the part of the Customer, Mobistar has the right to unilaterally change this payment period. The Customer shall be informed thereof in writing.

10.5.2. The invoices are settled via the following methods of payment:

- by bank transfer, with the form that is included with the invoice, without altering the data that Mobistar has printed on it;
- by direct debit;
 - a) from a Belgian bank account. The pre-notification that is provided for in the European Payment Services Directive shall be communicated via the invoice, which can be sent to the Customer within less than the 14 days established in the Directive.
 - b) via a Visa, Eurocard, MasterCard or American Express credit card. The direct debit instruction is given using a form provided by Mobistar.

Mobistar reserves the right to request upon Activation that the invoices be paid by direct debit from a Belgian bank account or via a credit card accepted by Mobistar.

Moreover, Mobistar reserves the right to demand that the payment, in whatever form, be secured by a bank guarantee from a bank that is accepted by Mobistar.

10.5.3. Expiry of the payment period entails that the Customer is ipso jure in default, without a demand being required. As of the expiry of this period, late-payment interest shall be owed automatically and without prior formal notice of default at the statutory interest rate, as well as liquidated damages of 15 % of the total invoice amount, with a minimum of 62 euros.

10.6 Unique character of the contractual relations
Accounts receivable that the Customer owes on the basis of a contract with Mobistar may be assigned to any other contract that the Customer has entered into with Mobistar.

10.7. Complaints

All complaints concerning the invoices must be clearly substantiated in writing, sent by ordinary mail to Mobistar's customer service department within 1 month after the date of the disputed invoice. After this period, the Customer is irrevocably deemed to have accepted the invoiced amount. The filing of a

complaint does not release the Customer from his obligation to pay the undisputed part of the invoice. The call registrations (reports of calls) that serve as the basis for the invoicing and which are stored by Mobistar, shall prevail over any other proof, without prejudice to the Customer's right to provide evidence to the contrary by all means.

10.8. The invoicing concerning the different services of Mobistar may be grouped in a single invoice.

10.9. The Customer can request a duplicate of his invoice on condition that the invoice date is not older than 18 months. Administrative expenses may be charged for each duplicate. The Customer's assertion that he did not receive a specific invoice does not release the Customer from his obligation to pay the amount included on this invoice.

10.10. Late payment as a result of which demands must be sent out can entail the charging of administration costs. This is also the case for any refusal of payment of a domiciled invoice by the financial institution designated by the Customer, or in the event of refusal of payment of a domiciled invoice on a credit card, or if the mention on the transfer of the Customer is incorrect or incomplete.

Article 11 – Property rights – The SIM card

11.1. The Parties agree that each party shall be the exclusive owner of all intellectual properties that were developed or acquired prior to the date of the signing of this Agreement and that all such intellectual properties shall remain the exclusive property of the party in question.

11.2. Mobistar shall be the owner of all intellectual properties, regardless of how they are developed (either independently, or together with a third party), that are derived from its services and products, except with regard to the Value Added Solution.

11.3. Mobistar is and remains the sole owner of the SIM card. The Customer may not destroy or damage the SIM card in any way whatsoever. The Customer shall take all necessary precautions in order to prevent the SIM card from being wrongly or unlawfully used.

11.4. Mobistar reserves all intellectual property rights relating to the SIM card and the Documentation. The Customer acquires a single non-exclusive licence to use the SIM card and the Documentation (and to grant a use right to the Users) for the purposes and within the limits that are set out in the Agreement.

11.5. The Customer is allocated a PIN code (personal identification number) and a PUK code (personal unlocking

key), which protect the access to the SIM card. The Customer must use these codes in accordance with the instructions in the manual of his Machine or Device. The Customer is responsible for strictly maintaining the secrecy of these codes.

11.6. The Customer undertakes not to copy the SIM card and/or the Documentation nor to allow them to be copied. The Customer also undertakes not to subject the SIM card to any form of decompilation, analysis or reverse engineering, not to create any derivative software and not to use the software in ways other than those which are described in this Agreement.

11.7. The Customer is solely liable for the proper insertion of the SIM card into his Machine or his Device.

While the SIM card is in the possession of the Customer or of his Users, the Customer is solely responsible:

- for each use of the SIM card and for the consequences of that use;
- for the loss, theft or damage of the SIM card and/or the Documentation

11.8. The Customer shall immediately inform Mobistar by telephone in the event of loss or theft of a SIM card. At the same time, he will ask to suspend the line in question. The Customer is released from the payment of any and all costs resulting from the use of the SIM card after this notification by telephone.

11.9. In the event of a defect of the SIM card and if such a defect falls under Mobistar's responsibility:

- Mobistar shall replace the damaged SIM card;
- otherwise, the provisions of article 12 of the present Agreement will apply.

11.10. The Customer must immediately return the SIM cards and the Documentation to Mobistar if the latter so requests, for whatever reason, and more specifically in the event of misuse of the SIM card by the Customer and/or his Users.

11.11. The use of the trademark and the logos of the other Party is only allowed in conformity with the provisions of this Agreement and after the advance written approval of each Party before any use of the trademarks and logos. Under this Agreement or otherwise, the Parties have no intellectual property rights - nor will they acquire them - on the trademark and logo of the other Party.

11.12. The Customer guarantees that the Value Added Solution does not infringe the intellectual property rights of any third party. The Customer shall fully indemnify Mobistar against loss, costs, expenditures, claims or monetary obligations, both directly and indirectly as a result of a claim from a third party against Mobistar

on the basis of the assertion that the Value Added Solution infringes such intellectual property rights.

Mobistar shall inform the Customer as quickly as possible of infringements, presumed infringements or alleged infringements by the Value Added Solution of the intellectual property rights of a third party.

Article 12 – Performances, obligations and liability of Mobistar

12.1. Performances of Mobistar

(a) Mobistar shall from time to time organise training sessions on the Service in its site in Brussels or on site at the Customer's, and this so that the Customer can fulfil its implementation and solution-related obligations under this Agreement.

(b) Mobistar shall give support to the Customer, as explained in the Special Terms & Conditions. Mobistar and the Customer agree to work together in order to guarantee the quality of the Value Added Solution, if applicable. The foregoing does not constitute any guarantee on the part of Mobistar vis-à-vis the Customer or the Users.

(c) Mobistar shall manage the Service on a "post-implementation basis". These management responsibilities include the provision of the network, the provision and Activation of the SIM cards, telecommunications support, database management, upgrades, training, customer services and other services relating to the day-to-day management.

(d) Mobistar shall comply with all statutes, regulations and other legal requirements that apply to this Agreement and the provision of the Service.

(e) Actions of Mobistar in the event of security and integrity incidents

Mobistar undertakes to incorporate security measures into the Mobistar telecom and IT network, so that potential misuse is minimised. Mobistar cannot thereby exclude every form of improper use or the improper disclosure of data. As with other incidents, possible security and integrity incidents are followed up the Mobistar Operations Center that monitors incidents 24/7 and if necessary, can request support from the technical experts.

12.2. Support of the Customer

When the Agreement enters into effect, Mobistar communicates to the Customer the necessary information relating to the Service. The Customer shall himself designate a specific employee

who is responsible for the centralisation of any problems. The Customer or User must contact this specifically-designated employee so that a problem can be qualified and in order to prevent a Customer from contacting Mobistar for a problem not falling under Mobistar's responsibility. The Customer shall be responsible for filtering all problems relating to the Service provided by Mobistar.

Mobistar makes a customer support available in order to as far as possible provide responses to the questions, problems and complaints of the Customer relating to the Service.

The Customer accepts that calls from or to Mobistar's customer service department can be recorded or listened to by persons who do not themselves participate in the conversations, with a view to training and supervising Mobistar's personnel. The Customer has the possibility to refuse this on a conversation-by-conversation basis.

12.3. Best-efforts obligation

Mobistar undertakes to do everything in its power to provide optimal access to the Mobistar network and the Service. Mobistar has a best-efforts obligation. Mobistar autonomously chooses the technical means that are necessary to establish this access in the best circumstances.

Mobistar shall do everything possible in order to establish M2M or Mobile App telecommunications in conformity with the general provisions of this Agreement. Mobistar thus does not guarantee the complete, adequate or timely functioning of the SIM card or the network.

Mobile telephony and/or data transfer is a form of wireless communication on the basis of radio signals that are transmitted. These signals can be disrupted by an external source or by obstacles that are inherent to buildings, the vegetation or the landscape or by other disruptions in other telecommunication networks with which Mobistar is connected. For this reason, a perfect transmission cannot be guaranteed everywhere and at all times.

Moreover, the quality of the Service also depends on the quality and the characteristics of the Machines or Devices that the Customer uses. Mobistar cannot be held liable for transmission disruptions that result from circumstances such as those mentioned above.

The Service functions through the use of radio signals, wireless and fixed networks. Therefore the Customer must never rely solely on the Services for critical applications. The Customer must ensure that he has the necessary contingency plans.

The Mobistar network and the Service occasionally require maintenance, reinforcement, modification, extension, renovation or other works. As a result, a part or all of the Service may be temporarily disabled. In that event, Mobistar shall do what is necessary to limit these periods of interruption to a minimum, even if they are unavoidable. If possible, Mobistar shall notify the Customer in advance of planned interruptions of the Mobistar network.

Roaming is based on telecommunication systems of foreign networks, over which Mobistar has no control. Mobistar offers no guarantees with regard to the availability and quality of the roaming services.

Mobistar cannot guarantee the access and the support of the Service if the SIM card forms the object of decompilation, analysis or reverse engineering or if the SIM card is wrongly or unlawfully used in some other manner.

12.4. Responsibilities

12.4.1. Mobistar is not responsible for disruptions in the Service resulting from:

- malfunctions or interruptions of network connections due to an external source or obstacles inherent to the environment;
- hardware or software – other than the SIM card – that the Customer uses;
- changes in the use conditions or the environment of M2M or Mobile App by the Customer;
- more generally, all factors that have no connection with Mobistar but rather with external factors or actions of third Parties.

Mobistar is not responsible for the content of signals and messages, or the harm that they may cause.

Mobistar shall not be held liable for the accessibility, content or legality of the data transmission services furnished by third Parties, or for the time or the volume of data that is required in order to obtain the desired information.

Mobistar shall not be liable for any changes as a result of prescriptions imposed by the BIPT or other regulating authorities.

Mobistar is not liable for incorrect use of the SIM card by the Customer or a User or the poor functioning of the SIM card as a result of misuse by the Customer or a User.

Mobistar cannot be held liable for harm in the event of or as a

result of cases of force majeure. The following situations, amongst others, are explicitly regarded as cases of force majeure:

- The consequences of ice, fire, natural disasters, riots, floods, strikes or lock-outs;
- Non-availability of transport, lack of means of transport;
- Statutory or administrative restrictions with regard to the making available of the Service;
- Measures that are imposed by the competent authorities and as a result of which it becomes impossible, more difficult or significantly more expensive to make the service available than it was at the time the Agreement was concluded;
- Accidents, damage, loss, theft, defects, etc. with regard to the buildings, vehicles, machines or other objects that are not under the control of Mobistar, its suppliers or its subcontractors;
- Overloading of the Mobistar network.

12.4.2. If Mobistar is held liable for a fault on its part, the indemnification applies only for the direct, personal and certain damage that the Customer has undergone, to the explicit exclusion of compensation of any indirect or intangible damage and/or harm, such as commercial damages, business or turnover losses, data losses. The amount of the indemnification that Mobistar should have to pay under the above-mentioned conditions remains strictly limited to six times the monthly fee for the Service, with a maximum of 50,000 euros.

Article 13 – Obligations and responsibilities of the Customer

13.1. Information obligation

The Customer undertakes to inform Mobistar in writing at the latest within 5 working days of any change in the data that he provided when signing the Contract. If the Customer communicates these changes too late, he can make no claim for the implementation of modifications with retroactive effect by Mobistar nor for a re-invoicing.

13.2. Normal and careful use

The Customer undertakes to use the Service that Mobistar provides to him with due care, in conformity with the provisions of the Agreement and the applicable statutes and regulations. It is prohibited to use the Service in a manner contrary to public order, policy or good morals. In particular the Customer undertakes not to use the Service (nor to give a third party consent/occasion to do so) in order to send or receive elements or data of any kind that are contrary to the applicable laws and regulations, which have a threatening, injurious, insulting character, impair confidentiality obligations or violate property rights. The Customer undertakes not to - intentionally or

negligently - send any electronic and/or software element whatsoever via the Service that could cause harm of any kind to the computer systems of Mobistar or other internet users.

13.3. Hardware

The Customer undertakes only to use hardware that is in perfect condition. He undertakes not to connect to the network any hardware that can result in disruptions of the Service. In the event of a breach that could lead to such disruptions, Mobistar may fully or partially deactivate the Customer's SIM card(s).

13.4. Closed User Group

The Customer undertakes to use the Service exclusively for data transmission between remote Machines and servers in accordance with the provisions in the Agreement. The use of the SIM card(s) is thus limited to a specific "Closed User Group", in other words between the Machines or Devices and the server that form part of a given solution/application. The SIM cards may be used exclusively in Machines or Devices with a view to M2M or Mobile App applications and may under no circumstances be used in devices of the 'GSM gateway' type or in comparable devices.

13.5. The Customer must, if he grants access via the internet to his own data and/or software, take all appropriate measures in order to maintain the availability, integrity and confidentiality thereof, above all by protecting them against infection by possible viruses.

13.6. The Customer shall make no declarations or offer guarantees or warranties (i) on behalf of Mobistar or one of its suppliers or (ii) with regard to the performance capacity or the functional characteristics of the Service.

13.7. The Customer shall comply with all statutes, regulations and other legal requirements that directly or indirectly apply to this Agreement, including the laws concerning privacy protection and commercial practices, the laws concerning taxes and exchange transactions, and the statutes, rules and regulations concerning the export of technical data.

13.8. The Customer shall immediately inform Mobistar in writing of (i) any claim or judicial action with regard to the Service of which he gains knowledge, and (ii) any essential change with regard to the management of the Customer.

13.9. Machines

The Customer shall inform Mobistar about the Machines or Devices that are used. The Customer shall not use any other Machines or Devices unless he has received Mobistar's

express written consent.

If Mobistar performs a Machine or Device validation, Mobistar has the right to charge the Customer an amount of 1,000 € excl. VAT per day devoted to this Machine or Device validation, with a maximum of 10,000 € excl. VAT.

If the Machine is not a certified modem (included on the Mobistar list of certified modems, available from Mobistar at the Customer's request) or if the Machine was not validated during a pilot phase with modem validation, or if the Device is not a certified Device (included on the Mobistar list of certified Devices, available from Mobistar at the Customer's request) or if the Device was not validated during a pilot phase with Device validation, Mobistar shall be entitled to charge a fee of 1,000 € excl. VAT per day spent solving the problem in question with a maximum of 10,000 € excl. VAT per incident for each problem relating to the provision of the Service to the Customer where it is established that this is attributable to the Machine or Device used by the Customer or the User.

13.10. The Customer shall strictly comply with the Mobistar Communication Chart and Brand Guidelines, available at www.mobistaridentity.be, as updated from time to time.

13.11. The Customer shall (i) not reverse engineer, decompile or disassemble the hardware or software or equipment that is made available or displayed by Mobistar and the Customer shall (ii) not remove, print over or render illegible mentions of a copyright, a trademark, a logo, a legend or some other ownership mention on originals or copies of confidential information communicated by Mobistar.

13.12. The Customer shall pass on a volume forecast per project. The Customer shall have sufficient personnel and resources available in order to attain the volume forecast.

13.13. If the Customer sells the Services as part of a Value-Added Solution to Users, the Customer shall also comply with the following provisions:

(a) he shall at his own expense make commercially reasonable efforts to promote the Value Added Solutions and to otherwise create a market for these solutions. These efforts may consist, without limitation, of sales visits, advertising and participations in trade fairs and exhibitions, and the purchase and display of demonstration units relating to the service and/or the product. All marketing and promotional activities and all materials that the Customer uses in relation to the Value Added Solution and which are not provided by Mobistar and that bear the Mobistar brands must correspond with Mobistar's written brand guidelines. Moreover, the Customer must submit samples of such materials to Mobistar at Mobistar's request, in order to protect Mobistar's rights on its brands. The Customer shall comply with all legal

requirements that apply to promotion and marketing vis-à-vis customers and he shall avoid fraudulent, misleading, illegal and unethical practices with regard to the marketing and promotion of the Value Added Solution.

(b) he shall develop the capacities to effectively commercialise and sell the Value Added Solution. This includes, but is not limited to, the fact that his personnel receives training from Mobistar and learns to make use of the sales tools furnished by Mobistar.

13.14. Public announcements and press releases

The Customer is not authorised to make public announcements or to publish press releases regarding Mobistar without Mobistar's formal approval. The formal approval can be obtained if the Customer complies with the process described below:

- Send to Mobistar the text (or speech) and the media plan (or the details of the event) at least 6 weeks prior to the public disclosure or the event
- Submit the text (or speech) and the media plan internally for Mobistar's approval
- Mobistar gives the Customer a formal written approval

13.15 Liability

13.15.1. The Customer is solely liable and shall solely owe compensation for the use of the Service. The Customer is solely responsible and liable for the execution of his contractual obligations, even if he has indicated several Users within the framework of the Agreement. Under no circumstances shall Mobistar have to take account of any assignment to a third party.

The Customer solely is liable for all direct or indirect damage as a result of failure to fulfil one of his obligations within the framework of the Agreement. The Customer must compensate Mobistar for the damages caused thereby, without prejudice to all other rights and claims of Mobistar.

13.15.2. In the event of disablement, shutdown or disconnection of a SIM card due to a breach of this Agreement by the Customer or misuse by a Customer, the Customer shall indemnify Mobistar against any claim of third Parties, such as a User, as a result of this disablement, shutdown or disconnection.

Article 14 – Ordering and activation processes

14.1. The Customer shall be able to order new or additional SIM cards from Mobistar.

In any event, Mobistar shall invoice the Customer as of the date on which the SIM card is activated.

All SIM cards that Mobistar delivers to the Customer must be connected to the Mobistar network. If a SIM card is not connected to the Mobistar network within 90 days after the delivery date, Mobistar reserves the right to demand that the Customer return the SIM card to Mobistar or pay to Mobistar the monthly cost price for each SIM card that is not connected.

14.2. Pre-activated SIM cards for test purposes

Mobistar, by mutual agreement with the Customer, can provide pre-activated SIM cards to the Customer in order to test the integration and functioning of the SIM card and the Service in the Value Added Solution.

The test SIM cards are made available to the Customer with a predetermined fixed and pre-activated value.

The pre-activated fixed value is described in detail in the Special Terms & Conditions.

The test period of these pre-activated SIM cards shall in any case be limited to a maximum of 24 months as of the date of activation of the pre-activated SIM cards provided to the Customer. The Customer is not authorised to suspend pre-activated SIM cards.

Mobistar shall begin to invoice the Customer for these pre-activated SIM cards as of the moment that the fixed predetermined value of the test SIM cards is used up or otherwise as of the moment that the 24-month test period has expired. In order to avoid any misunderstanding, it is specified that Mobistar shall in any case begin to invoice the Customer after 24 months even if the pre-activated fixed value of the test SIM cards is not completely used up at that moment.

14.3. Test SIM cards

Mobistar can provide SIM cards to the Customer via a manual process in order to test the Service (Test SIM cards).

If Test SIM cards are requested by the Customer for a specific User/prospect, Mobistar shall agree in advance in writing with regard to:

- the number of SIM cards
- the profile of these SIM cards (type of steering, possible GSM data number, roaming, etc.)
- the limited active period of these Test SIM cards that will apply for this specific User/prospect.

The activation of the Test SIM cards will be done by Mobistar at the Customer's written request. The Customer will completely fill out the standard form for ordering test cards, available from Mobistar, and send it back to Mobistar in order to request the activation.

14.4. Portal

14.4.1 Availability and Use

Under certain conditions Mobistar can grant the Customer access to the Portal.

The Portal is a self-care tool offered to the Customer in order to give him a complete overview of and control over his Fleet of SIM cards.

More specifically, the Portal includes the following applications:

- Management of the SIM cards: orders, activation/pre-activation, suspension, deactivation, reactivation, swap profile;
- Management of the use rights within the Customer's organisation;
- Management of incidents: creation of tickets relating to an incident and follow-up of these tickets (provided that the Customer has signed an IT Security Schedule);
- Information relating to the invoicing: access to the invoices and to analytical tools (subject to a specific request for access).

The Portal is accessible via the internet or partially via web applications that are available in order to integrate the Portal into the Customer's IT applications.

The Customer undertakes to use the Portal that is provided to him by Mobistar with due care, in conformity with the provisions of the Agreement and the applicable statutes and regulations and not to violate rights of third parties.

The Customer alone is responsible for the actions requested via the Portal and for the consequences thereof, such as the impact on the invoicing and the impact on the service itself. Mobistar cannot be held responsible for damages resulting from the actions requested by the Customer via the Portal or resulting from the erroneous, non-conforming or unlawful use of the Portal by the Customer.

Mobistar shall do everything in its power so that its systems automatically perform the requested actions which the Customer passes on via the Portal as quickly as possible. This is a best-efforts obligation for Mobistar.

The Portal is the first and only contact point for the applications that are made available via the Portal. The Portal shall first be used by the Customer before contacting the customer support department.

The Portal and the data that are available via the Portal remain the property of Mobistar. In order to give access to the Portal, Mobistar shall provide the Customer with a personal access code and the Customer will receive a limited, non-assignable right of

access to the Portal and the data that are available via the Portal. The Customer is solely liable for the use of the personal access code, and undertakes to safeguard the secret and confidential character of this code and to neither communicate it nor assign it to any third party.

Mobistar reserves the right to make changes to the Portal or its conditions of use, or to discontinue the Portal or a part thereof. Mobistar reserves the right to impose limits with regard to the number of transactions that the Customer may send or receive via the Portal.

14.4.2. Compatibility of Portal versions

When necessary for the proper functioning, Mobistar shall issue new releases of the Portal in order to offer the Customer new functionalities or to strengthen the Portal's internal functionalities.

New releases of the Portal will have an impact on the Web interface (URL) and on the Web Services.

Mobistar shall notify the Customer within a reasonable advance period of the planned new releases.

Web Interface

The Customer shall automatically benefit from new Web interface releases.

Web Services

With regard to the Web Services, there will be an impact for the Customer only in the case of changes to the interface design that are necessary in order to continue using the Web Services. In that event, Mobistar shall notify the Customer two months prior to issuing the release, except in the case of an urgent release that is necessary for the proper functioning of the platform. The Customer is obliged to make the necessary changes to his systems in order to bring them into correspondence with the release in question and in order to be able to benefit from the obligatory functionality in question.

In the event of changes to the interface design that are optional for the Customer, i.e. not necessary so as to be able to continue using the current release, the Customer shall be able to continue using the current release without changes to his systems. In that event, however, he will not be able to benefit from the new functionality. If he wishes to use the new functionality, he must make the necessary changes in order to adapt the Web Services in his systems.

Article 15 – Suspension of the Service by Mobistar

15.1. In the event of non-payment of all or part of an invoice

amount on the due date, and if the Customer has not acted on a written demand of Mobistar in which a 1-week regularisation period was given, Mobistar can ipso jure and without compensation immediately suspend provision of the Service(s) to the Customer, except in case of a justified dispute by the Customer of the invoiced amount.

15.2. If the Customer or a User or a later customer of the Value Added Solution does not fulfil other obligations vis-à-vis Mobistar, as set forth in these Machine to Machine General Terms & Conditions or any applicable Special Terms & Conditions, such as inter alia the obligation to make careful and normal use of the Service, or fails to respect the conditions of use of a Service, Mobistar can immediately suspend this Service without formal notice of default or compensation. Mobistar can also do this in the event of proof or serious indications of fraud.

Mobistar reserves the right in the event of abnormal increases in the consumption by the Customer or the User, and this if possible compared to the average consumption of the preceding 3 months, as a precautionary measure to suspend the access to the Service, after having informed the Customer thereof (if possible) by all suitable means. Mobistar can suspend the service if SIM cards are not being actively used (no incoming and/or outgoing traffic) during a period of 12 months.

15.3. Mobistar can immediately, without advance notice or compensation, suspend the Service in cases of force majeure or for reasons that relate to the technical operation. Mobistar undertakes to inform the Customer about this as far as possible and by all suitable means. Mobistar shall do everything in its power in order to limit malfunctions to a minimum and to resolve them as quickly as possible.

15.4. In the event of suspension in conformity with this article 15.1 and 15.2, the Customer remains bound to respect all obligations, including the payment obligation, that are imposed on him by the Agreement. One month after the starting date of the suspension, Mobistar may terminate the Agreement automatically and with immediate effect.

Article 16 – Termination of the Agreement

Mobistar is entitled to demand that the Customer return the SIM card(s) upon termination of the Agreement.

16.1. At Mobistar's initiative

16.1.1. If the Customer has not remedied the situation within ten days following the suspension of the Service by Mobistar under article 15.1 and 15.2, Mobistar shall be entitled to immediately terminate the Agreement in writing, without advance notice or compensation in lieu of advance notice or compensation for damages.

16.1.2. Mobistar can immediately cancel the Agreement by means of a registered letter, without advance notice or compensation in lieu of advance notice or compensation for damages, if it determines that the Customer gave Mobistar inaccurate, false or incomplete essential information upon submission of the Contract or if the Customer neglected to communicate major changes with regard to the provided information or if the Customer uses the Service for purposes that are contrary to public order, policy, good morals or a legal or regulatory provision, or in conflict with this Agreement.

16.1.3. Mobistar can immediately terminate the Agreement ipso jure in the event of bankruptcy, judicial composition, request for deferment of payment, liquidation or dissolution of the Customer's company.

16.1.4. Outside of the cases of immediate termination provided for in the articles 16.1.1., 16.1.2. and 16.1.3., Mobistar can cancel the Agreement in accordance with the provisions of article 4.

16.2. At the Customer's initiative

16.2.1. The Customer can cancel the Agreement after expiry of the agreed contractual period in accordance with the provisions of article 4.

16.2.2. Without prejudice to all of Mobistar's other rights, if Mobistar puts an end to the Agreement due to a fault of the Customer, or if the Customer puts an end to the Agreement before the end of the agreed contractual period, he shall owe Mobistar a fixed and non-negotiable compensation that is determined as follows:

Per SIM card, the amount of the compensation is determined as follows:

SIM cards that are active between 1 and 12 months:
compensation = 6 months' 'flat fee' per card, or if no 'flat fee' applies = 6 months' 'average card value' per card

SIM cards that are active between 13 and 35 months:
compensation = 3 months' 'flat fee' per card, or if no 'flat fee' applies = 3 months' 'average card value' per card

SIM cards that are active for more than 36 months: compensation = 1 month's 'flat fee' per card, or if no 'flat fee' applies = 1 month's 'average card value' per card

'Flat fee': the compensation described in the Special Terms & Conditions

Average Card Amount: the weighted average that corresponds to the total invoiced amount during the last three months divided

by the total active basis of SIM cards of the Customer, excluding suspended cards.

The sum of all these amounts constitutes the total compensation owed by the Customer. This calculation is done on the day of the termination.

16.3. Consequences of the termination

The termination of a Contract entails ipso jure the termination of the Services included therein. The termination, for any reason whatsoever, has no effect on the Customer's obligation to pay all owed amounts.

Article 17 – Roaming Regulations and Information for the Customer - Exception for the Service

On the basis of the applicable EU Roaming Regulation, Mobistar is obliged to communicate the following information, at no expense, to all customers who cross a European border:

- the maximum roaming rate applied for voice (outgoing and received calls);
- the possibility to receive additional information via a free call to a specific number;
- as of 1 July 2009:
 - the maximum roaming rate applied for SMS;
 - the maximum roaming rate applied for MMS and data;
 - the possibility to call all European emergency services at no expense using the number 112.

On the basis of this EU Regulation, Mobistar must also implement a system of rate transparency on the basis of which the roaming data sessions will be interrupted as of a certain default financial limit, set by the EU Regulation at 50 €, except at the explicit request of the customer.

The EU Regulation also provides that this obligation to furnish rate information does not apply to devices that do not support the SMS functionality and that the system of rate transparency does not apply to machine to machine applications that use mobile data communication.

This exception applies for the Services provided under this Agreement and the Machines or Devices used for the Service.

The Customer accepts that the above-mentioned information and transparency measures are not applied to his entire Fleet of Mobistar SIM cards for the full term of the Agreement.

Article 18 – Signature of the Customer

A fax message and the signature on it have the same probative value as the original message and the original signature.

In so far as permitted by law, the e-mail communication between Mobistar and the Customer has the same probative value as written proof.

Each confirmation via e-mail or via Mobistar's website by the Customer or via the Customer's mobile telephony device (e.g. via SMS), of Services proposed or offered by Mobistar or of changes to the Service, or each order or action via the Portal engages the Customer, and the Customer is thus contractually bound for the relevant activations and/or changes of the Service. Relevant electronic communication data are stored by Mobistar, and this for a time period that is no longer than necessary.

Article 19 – Assignment

19.1. At Mobistar's initiative

Mobistar is entitled to assign all or a part of its contractual rights and duties to a third party, without having to obtain the Customer's consent for this and without the latter being able to demand any compensation in connection with this assignment. However, the Customer may in this case terminate the Agreement within 15 days after the notice of the assignment, via a registered letter to the attention of the assignee.

19.2. At the Customer's initiative

The Customer may only assign - in whole or part - his contractual rights and duties to a third party subject to Mobistar's consent and after the Customer and the assignee have signed the assignment form drawn up by Mobistar. The assignee must also sign a new contract and accept the Machine to Machine General Terms & Conditions.

Article 20 – Non-waiver

The fact that one of the parties may at some point fail to demand strict application of one of the provisions of the Agreement may under no circumstances be regarded as a waiver of the rights that this party possesses. This fact does not impede this party from later demanding strict compliance with this provision or any other condition of the Agreement.

Article 21 – Invalidity

The invalidity, ineffectiveness or unenforceability of a given clause

of the Agreement shall not affect the validity, effectiveness or enforceability of the other provisions of the Agreement, unless the Agreement cannot survive without this clause.

Article 22 – Complaints and disputes

22.1. Amicable settlement

a. In the event of complaints, the Customer shall address Mobistar's customer service department.

b. If the Customer is not satisfied with the answer of Mobistar's customer service department, he can contact the Office of the Ombudsman for Telecommunications that was set up by the competent authorities:

Office of the Ombudsman for Telecommunications
Bischoffsheimlaan 29-35
1000 Brussels
Tel.: 02 223 09 09
Fax: 02 219 86 59
E-mail: klachten@ombudsmantelecom.be
Website: www.ombudsmantelecom.be

22.2. Jurisdiction

Any dispute relating to the existence, interpretation or execution of the Agreement that cannot be settled between the Customer and Mobistar shall fall under the exclusive jurisdiction of the courts of Brussels.

22.3. Applicable law

All provisions of the Agreement fall under Belgian law.

Article 23 – Notification

All communications to Mobistar must be addressed to Mobistar's customer service department.
